**When our customers do well, then so do we. Nothing pleases us more than helping our customers to be as efficient and profitable as possible.**

We supply the widest range of 100% recycled papers that enable you to maximise your profits and your green credentials. Our sales teams will support you every step of the way, from product selection through to complete delivery, ensured by our own fleet of vehicles. Taking the initiative, our technical experts constantly visit customer sites, using their skills to get the very best out of our papers and your corrugators. And, naturally, all of this is just part of the service from the UK's leading papermaker.

# sustainable

**At DS Smith Paper, sustainability is built into every product, all of which are 100% recycled and recyclable.**

Using sophisticated technologies, in which we have invested heavily, we manufacture over one million tonnes of paper every year from waste paper, preventing it from going to landfill. We have been at the forefront of technological advances in recycling waste paper, manufacturing quality papers that can replace virgin fibre. Together with sister companies, DS Smith Packaging and DS Smith Recycling, we are an integral part of a recycling loop; making paper, producing corrugated packaging, collecting the used corrugated and turning it into paper – over and over again. So, naturally, we are able to help our customers meet increasing demands for more sustainable packaging.
