## Trident

**Trident's built-in strength ensures consistent performance on the corrugator, time after time.**

This triple ply liner is manufactured in the UK, using sophisticated computer controls and without chemical additives. The result – a cost-effective testliner that performs extremely well, especially in conditions of high humidity or cold storage. What's more, Trident outperforms all other testliners not only on strength, but also smoothness, runnability and colour. And, naturally, coming from DS Smith Paper, Trident is 100% recycled and recyclable.
